

# Warren Park Primary School

## PUPIL PREMIUM Expenditure Impact Statement 16/17

### Background

Pupil Premium funding is provided by the Government to address the underlying inequalities between those children identified as disadvantaged and those who are not. It is recognised that securing high levels of attainment and good rates of progress is the best way of steering our pupils towards a future free of deprivation. Warren Park has decided to dedicate a significant proportion of its pupil premium allocation directly into ensuring all pupils receive high quality teaching and learning. However, we also recognise that attendance, behaviour, emotional well-being, home life are significant barriers to learning and that those children and their families may require additional support to overcome those barriers. Therefore some of our Pupil Premium resource is spent on providing support in those areas. By spending money in these areas has supported the impact that by the end of Key Stage 2 the gap between Pupil Premium children and Non-pupil premium has narrowed.

The spending of the money falls into three main areas:

### 1. Academic

By having additional teaching staff has meant that children have been able to access both pre and post additional sessions as well as being taught in smaller groups. This has ensured that the gap between PP children and non PP children is relatively small by the end of KS 2

The cost of this areas has been in providing additional teaching staff in each year group, plus employing a Speech and Language Therapist (SALT) 2 days a week.

Combined Reading, Writing and Maths data 2016

	School	National
All children	67%	53%
Pupil Premium children	67%	60%

When the separate subjects are compared it is only in writing that Pupil Premium children don't do as well and the gap is only 1%.

KS2 Writing

	School	National
All children	74%	74%
Pupil Premium children	73%	59%

Cost: £200,000

### 2. Providing a "Can do attitude"

"If children's emotional needs are meet then they can focus on academic needs" – John Hattie's research.

To support children's emotional needs:

- All classes have fortnightly PHSE lesson.
- The school has employed 2 ELSAs and are training a third one.
- The school subsidises school both day and residential trips.
- Plus all of KS1 children were able to go to the theatre.

Cost: £37,890

### 3. Supporting home life

The school supports home life by:

- Parents feel supported with dealing with their children's behaviour outside of school
- Children start school having had a breakfast
- Increased attendance rates for individual children

The school have employed a full time Home School Link Worker and provides a free breakfast club.  
Cost: £40,000

The school spends the money to enhance the educational provision for those children that are entitled to it. The money we spend is more than we are given but the governors have agreed to spend the extra money to provide these extra areas of support for our pupils. The figures shown are only the costing under PP funding and are not the fully amount necessary to provide these support.
